TECHNICAL SKILLS

- **Frontend**: React.js, JavaScript, HTML5, CSS3, Bootstrap 5, Angular.
- **Backend**: Spring boot, Spring JPA, REST API, Java, .NET Core MVC, Nodejs

WORK EXPERIENCE

Mastek   **Mahape**

Software Engineer   **Feb 2023 - Present**

- Acknowledged by the client for outstanding contributions in .**NET Core MVC**, JavaScript, HTML, and CSS development, playing a key role in enhancing and implementing new features and overall **project efficiency**.
- **Led a team** in the successful upgrade of the project to a newer Bootstrap version, showcasing **leadership** and technical expertise skills. The upgrade aimed to improve **user- experience(U/X)** and keep technology stacks up to date.
- Innovated and implemented a user-friendly feature, allowing seamless progression through the declaration form even without signing. Introduced a checkbox and dropdown mechanism, auto populating date and time fields, significantly **enhancing the user experience**.
- Successfully delivered multiple features, all of which are live and actively used by end-users in **UK England**, contributing to the project's success.

Trainee Software Engineer   **Apr 2022 - Jan 2023**

- Contributed to the success of the **UK Ecommerce** Project, focusing on ReactJS for frontend and Spring Boot for backend development actively participating in the design and development of the products page layout and **Rest API's**.
- Utilized **ReactJS** skills to enhance user interfaces, ensuring a seamless and visually appealing shopping experience for end-users.
- Learned, developed, and maintained APIs using **Spring Boot**, **Spring JPA** enabling efficient communication between the frontend and backend systems.
- Played a key role in designing and implementing the layout of the products page, emphasizing user-friendly design and optimal user experience.

EDUCATION

Rizvi College of Arts, Science and Commerce   **Mumbai, Bandra**

Bsc.IT *(Information Technology)*   **Oct 2020**

ACHIEVEMENTS

- Successfully tackled **350+ coding problems** on Leetcode platform**.**
- Led a team for bootstrap upgrade being a jr. software engineer in a team.

PROJECTS

Netflix clone

- Designed and developed a Netflix website clone using **Angular**, incorporating **third-party APIs** for movie data retrieval.
- Demonstrated front-end development skills by building the website from scratch.

Instagram / Swiggy UI

- Successfully recreated the user interface of Instagram using React, gaining valuable hands-on experience with React concepts and building a static website.
- Developed an accurate replica of the Swiggy homepage using **HTML** and **CSS**, demonstrating proficiency in front-end.
